

## BRH (Ballistic Reticle Heavy) / BRX Reticle (Ballistic Reticle Fine)

**BRH Reticle**

**BRX Reticle**

### Both are currently available in the following models:

- Z3 3-10x42
- Z3 4-12x50
- Z5 3.5-18x44
- Z5 5-25x52

The only difference between these reticles is the crosshair thickness. Designed for long-range shooting, eliminating the need for turret adjustments.

**BRX** (Ballistic Reticle Fine): Fine look, designed more for varmint hunters, target shooters, those preferring a thin reticle.

**BRH** (Ballistic Reticle Heavy): Thicker, heavier design for better low light hunting visibility or for those that prefer a heavier reticle.

### Features

- Windage compensation up to 20 mph
- Can be used to range to a target. Easy to use ranging chart included.
- Supported by BRH / BRX ballistic calculator at [WWW.SWAROVSKIOPTIK.COM](http://WWW.SWAROVSKIOPTIK.COM)
- Comes with 50 "factory" ballistic decals for popular hunting cartridges. These decals that can be used as templates for over 500 other cartridges that have virtually the same trajectories. These "Match Ups" are easily found in the BRH/BRX Decal Selection Chart supplied with every BRH/BRX instruction manual.

### Sample from BRH/BRX Decal Selection Chart

Decals available for most common cartridges

|             | Cartridge/Mfg.   | B.C.  | Decal Number      |
|-------------|--|-------|-------------------|
